

Aluminized Back Pad WP-211

Back-of-hand heat pad with an aluminized face and EmberTuff™ body that straps over your welding glove

- **Reflects radiant heat:** aluminized face shields the back of the hand during high-heat work.
- **Fits over your glove:** adjustable hook-and-loop straps fit over most welding gloves.
- **Built to last:** EmberTuff™ leather body with Kevlar® stitched seams.

KEY FEATURES:

- Aluminized face
- EmberTuff™ leather body
- Adjustable hook-and-loop straps
- Kevlar® stitched seams
- Universal fit

Front

Worn over a WG-121
