

EmberTuff Leather

Engineered for ultimate protection. EmberTuff features a proprietary heat treatment applied deep within the hide during tanning—never just a topical spray.

KEY FEATURES:

- Permanent Heat Resistance: Protection baked in, not sprayed on.
- Enhanced Durability: Treated to withstand the harshest shop environments.
- Uncompromising Dexterity: Stays pliable for quick, precise welding.

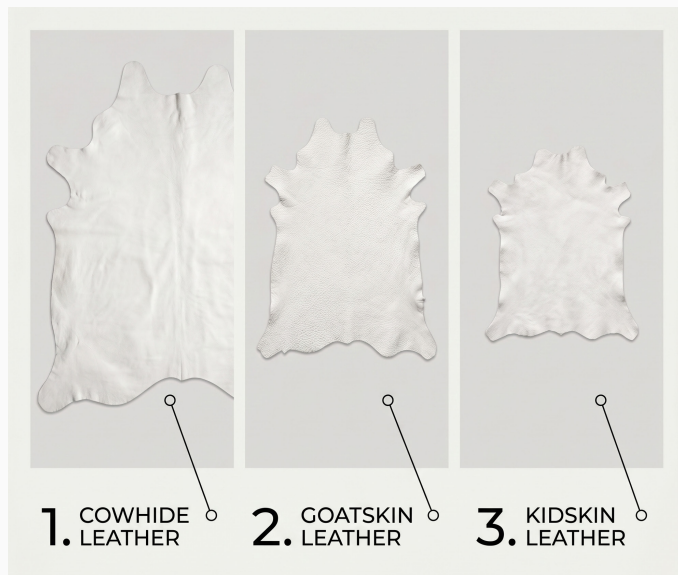

BoldKnit FR

Work with absolute confidence. This heavy-weight knit delivers uncompromising, inherent flame resistance right down to the fiber, allowing you to be bold while staying fully protected.

KEY FEATURES:

- Inherently FR: Zero added chemicals; protection comes naturally.
- Built In Safety: FR properties will never wash out or wear away.
- Heavy-Weight Protection: 315 GSM/ 9.3 oz/yd² knitted dual-face construction.
- Superior Colorfastness: Yarn-dyed to prevent color fading and bleed

Premium Leather Outer Shell

Premium Cowhide The industry standard for rugged, heavy-duty shielding.

Maximum heat and spark insulation.
Exceptional abrasion and puncture resistance.
Ideal for high-heat Stick (SMAW) applications.

Premium Goatskin The perfect balance of tough protection and natural flexibility.

High tensile strength for long-lasting wear.
Naturally rich in lanolin for maximum pliability.
Ideal for MIG and general-purpose welding.

Premium Kidskin The ultimate choice for extreme precision and control.

Ultra-thin and exceptionally supple.
Provides a true "bare-hand" feel for intricate work.
Ideal for detailed TIC welding tasks.
